EDUCATION

Vivekananda Institute of Professional Studies,
(Guru Gobind Singh Indraprastha University)

Delhi, India

Bachelor of Technology (Computer Science Engineering): CGPA: 7.96
Specialization: Machine Learning and Data Analytics

2022 - 2026

SKILLS

- **Programming & Scripting:** Python, JavaScript, SQL, C++, Data Structures & Algorithms
- **Libraries & Frameworks:** Pandas, NumPy, Matplotlib, Seaborn, React.js, Node.js, Express.js
- **Data Tools & Platforms:** Power BI, Microsoft Excel, MongoDB, SQL, Jupyter Notebook, AWS, Microsoft Azure,
- **Web Development:** MERN Stack, RESTful APIs, CRUD Operations, Responsive Design
- **Data Analytics & Visualization:** Data Cleaning and Transformation, Exploratory Data Analysis, Reporting, Statistical Analysis
- **Machine Learning:** Supervised Learning (Linear Regression, Decision Trees), Model Evaluation (Train-Test Split, Confusion Matrix)
- **Version Control & Workflow:** Git, GitHub, VS Code, Postman
- **Soft Skills:** Analytical thinking, problem-solving, adaptability, team collaboration, communication, Agile methodologies

WORK EXPERIENCE

INTERN – BUSINESS INTELLIGENCE | Nippon Data Systems Ltd. | [LINK](#)

July 2025 – September 2025

- Built and deployed interactive Power BI dashboards for sales and financial reporting.
- Integrated dashboards with ERP database to enable real-time business insights.
- Performed data cleaning, transformation, and modelling to support analytics.
- Delivered user-friendly visualizations that improved decision-making efficiency.

DATA ANALYST INTERN | Orangus India Pvt. Ltd | [LINK](#)

September 2024- December 2024

- Automated data pipelines and built Python scripts for process optimization and reporting tasks.
- Integrated machine learning predictions into Power BI dashboards using backend scripting and APIs.
- Formulated and optimized SQL queries for data extraction, anomaly detection, and fraud pattern recognition.
- Developed Excel-based analytics tools and dashboards with embedded logic for business reporting.

PROJECTS.

Electricity Demand Prediction | [LINK](#)

December 2024

- Engineered features using real-world data to improve forecast accuracy by 15%.
- Trained machine learning models to predict electricity demand based on weather and socio-economic factors.
- Constructed a real-time prediction system for enhanced load management.
- Deployed the project using Docker for isolated, portable, and scalable environment management.

Telecom Churn Analysis and Prediction| [LINK](#)

January 2025

- Developed a customer churn analysis model using SQL queries and machine learning algorithms, achieving 92% accuracy.
- Predicted customer churn with high precision, enabling retention strategies.
- Reduced churn by 8% through actionable insights from the model.
- Created Power BI dashboards for real-time customer retention insights and performance tracking.

Lead Generation Automation System (ETL Pipeline) | [LINK](#)

May 2025

- Developed an automated lead scraping pipeline using Apify and BeautifulSoup.
- Transformed and structured scraped data using Make.com workflows.
- Loaded cleaned leads into Google Sheets for real-time visibility and tracking.
- Demonstrated end-to-end ETL: Extract from websites → Transform with Make → Load to destination.

CERTIFICATES

Career Essentials in Data Analysis by Microsoft | [CERTIFICATE](#)

May 2025

- Obtained hands-on experience with Node.js, Express.js, React.js, and building full-stack applications from scratch.

Data Analytics (TechStack Academy | Saket, Delhi, India) | [CERTIFICATE](#)

June 2024 – September 2024

- Mastered Python, SQL, Power BI, and Excel for comprehensive data analysis and visualization.

AWS Essential Training for Developers (LinkedIn Learning) | [CERTIFICATE](#)

May 2025

- Gained foundational knowledge of AWS services and deployment practices.

Microsoft Azure AI Essentials Professional Certificate (Microsoft) | [CERTIFICATE](#)

May 2025

- Attained knowledge of AI concepts, responsible AI, and core Azure AI services like Machine Learning and Azure OpenAI.
